PPAD Information Radiator v2.1 — Release 2 Execution / PPAD Publication

Executive project status • Release 1 formally accepted • Release 2 evidence expansion nearly complete • Release 3 development intentionally deferred behind external feedback • Reporting layer only — Activities Log, RAID registers, Budget, Jira, and Git/GitHub remain authoritative.

Project Start	September 4, 2026	Report Date	September 12, 2026	Release 1 Baseline Target	October 26, 2026
				Actual Release Acceptance	September 9, 2026

Overall Registry Completion	Release 2 Fixed Work	Release 2 Completion	Release 1 Cost Performance	Evidence Package Gate
167 / 283	**73.50 / 77.50 hrs**	**32 / 33**	**Actual $25.00 / Baseline $28.75**	**2 / 3**
59.0%	94.8%	97.0%	87.0%	66.7%

Project Status	Current Phase	Cost Status	Immediate Next Action
GREEN	**RELEASE 2 — PPAD PUBLICATION & CONTROL RECONCILIATION**	**GREEN**	**Reconcile Jira → ACT-282 PPAD publication**
Active Risks 8 • Open Issues 0	Release 1 schedule 47 days early	Actual $25.00 / Cost Baseline $28.75	Next Gate: ACT-282 — Publish PPAD Project Management Evidence

Prioritize Portfolio	ACT-275	Not Started
Review Portfolio Roadmap /	ACT-283	Not Started
Mature Information Radiator	ACT-281	Deferred
Publish Journal / Historical	ACT-280	Deferred

Evidence Gate Score

66.7%

2 of 3 evidence packages complete

Release 2 Scope Lock

IMF + Residential

Release 3

Release 1 Closeout

Closeout Metric	Result	Status
Release Acceptance	9/9/2026	Accepted
Baseline Target	10/26/2026	47 days early
Release 1 Activities	127 / 127	100%
Release 1 Fixed Work	173.75 / 173.75	100%
Release 1 Lessons Learned	13 captured	**Complete**

RAID / Cost Snapshot

Metric	Value	Interpretation
Active Risks	8	Open + Monitoring + Triggered
Open Issues	0	Current unresolved issues
Open Dependencies	0	No current Release 2 blockers; historical content dependency is deferred to Release 3
Unvalidated	3	Require future evidence
Cost Baseline	$28.75	Planned direct cost + contingency
Actual Incremental	$25.00	Confirmed project cost to date
Remaining Cost	$3.75	Favorable balance before management reserve
Project Budget incl.	$31.63	Cost Baseline + management reserve

Recent Accomplishments

- Release 1 remains formally accepted with the historical baseline preserved.
- IMF Reserve Analytics was reconstructed, validated, published to GitHub, and published on jdylanbeckham.com.
- Residential Property Value Prediction was reconstructed, clean-kernel validated, published to GitHub, and published on jdylanbeckham.com.
- Horizon Line was de-scoped under CR-002; additional coursework, SQL/Python expansion, historical content, Radiator maturity, and visual-standardization work were pushed to Release 3.
- ACT-279 is complete for Release 2; PPAD publication is the remaining fixed-scope evidence deliverable.

Next Actions

- Reconcile Jira with the authoritative Activities Log, including Release 2 / Release 3 assignments and de-scoped work.
- ACT-282 — Package and publish PPAD project-management evidence and case study to jdylanbeckham.com.
- Publish milestone LinkedIn communications tied to Residential live status, Release 2 control status, and PPAD publication.
- After ACT-282, begin ACT-273–275 external feedback, effectiveness review, and improvement prioritization.
- Use external feedback to prioritize Release 3; do not begin deferred technical/content/visual expansion before the feedback gate.

Management Attention

- Release 2 is scope-locked to existing evidence publication and PPAD publication. Do not add new technical, historical-content, or visual-standardization work to Release 2.
- ACT-282 is the remaining fixed-scope Release 2 evidence deliverable; Jira reconciliation should precede execution.
- Release 3 backlog is intentionally deferred: ACT-154–156, ACT-164–246, ACT-280–281, plus portfolio visual-standardization / project-imagery enhancements.
- CR-002 Horizon Line work remains de-scoped and excluded from active scope
- A-008 remains unvalidated;

Management Inputs

Contingency Reserve %	15%	Cost Baseline reserve
Management Reserve %	10%	Project budget reserve

KPI Notes / Source Rules

- Activity metrics source: Activities Log columns K–N. The full ACT-001–283 registry remains authoritative.
- Release 2 metrics use Release Classification = "Release 2". Release 3, Deferred, De-scoped, Recurring, and Closeout work is outside the Release 2 denominator.
- Release 2 fixed-work completion uses Fixed Work Hours only; variable/recurring activities without a fixed-hour value are excluded from hour-based completion.
- Release 1 schedule and cost outcomes remain historical baselines and are not rebaselined by later release planning.
- RAID counts source the authoritative register status fields; the Information Radiator is a reporting layer, not a competing system of record.
- The large Release 3 backlog is intentional future work and should not be interpreted as Release 2 underperformance.
